AME deliver an Australian first
Announcing our exclusive Authorised
Partnership with Plant Assessor

As Australia's first and only Authorised Partner of Plant Assessor in Australia and New Zealand, AME is excited to be bringing you a revolutionary new plant risk assessment process, allowing your staff to conduct a comprehensive, machine specific assessment, faster than ever.

Plant Assessor is a plant safety company that has harnessed the power of the internet and associated technology to deliver intelligent solutions to assist in the management of plant safety.

A trusted solution provider, Plant Assessor helps thousands of plant suppliers and users manage plant safety practically, cost effectively and to the highest level.

Industry Updates

What's New?

Classified Plant Training Courses

AME provide the following Training:

- Classified Plant Awareness - Basic 1/2 Day

This unique risk assessment program covers over 4,000 makes, 80,000 models and 900 types of equipment, from power tools to large machinery and is used by the machinery, supply chain, construction, government, mining and plant intensive industries.

Plant Assessor is a world leader in its field and we are proud to have partnered with them to bring you this innovative technology.

AME - Fastest Growing Business Award

AME has won this quarter's 'Fastest Growing Business' award from internationally renowned business development organisation, ActionCoach.

With guidance from AME Business Coach Gavin Bassett and the exceptional AME management team, the Award recognises the hard work AME has put into the last few years, in particular their outstanding performance over the last quarter.

The AME management team, Managing Director Trevor Hughes, Operations Manager Stephen Ansell, and General Manager Rod Wakefield would like to congratulate our entire team and all those who contributed to AME's success going into a new financial year, let's keep the momentum going!

Contact us

At the end of this financial year, AME will be changing our accounting system from MYOB to Xero, so you may notice some changes on your next account. These changes won't have a major affect on how you pay your account, but please be aware that your invoices may look different.

If you have any queries relating to these changes, please feel free to call our Accounts team on **(08) 9466 7444** or [email us](#).

NEW! Ball Stud Inspections

We are excited to announce that our unique [Ball Stud Testing](#) is now available. Developed by Wayne Carter and assisted by NDT specialist Ann Jalava, our procedure is a non-destructive straight beam examination used to identify any damage that has developed during the operation of the machine.

Our two technical experts can tailor the process to suit your current planned scheduled maintenance and minimise downtime.

Wayne is a maintenance management professional with over 15 years experience in the mining and civil industry.

- [Non-Destructive Testing \(NDT\)](#) of Truck Ball Studs.
- Inspections of fixed and mobile plant and equipment.
- Preparation and analysis of maintenance strategies.
- Intimate knowledge of the MSIR 1995, OS&HR 1996 and relevant Australian Standards.
- Strong understanding of Health and Safety practices both on and off-site.

Classified Plant Training

“Trevor clearly knows the subject and is well qualified to lecture in the field. This course has been very useful and I greatly respect AME's capability in the field. BRAVO!”

We are proud to provide industry recognised Classified Plant Training for our clients, run by Lead Trainer and AME Managing Director, Trevor Hughes.

Trevor is a qualified Mechanical Engineer and a Chartered Professional Engineer, responsible for developing the Classified Plant Training programme.

An Asset Management Professional with over 34 years in maintenance management, project engineering and planning, Trevor has gained his experience in underground and open cut mining and in the processing, manufacturing and chemical industries.

He has been responsible for training Department of Mining and Petroleum Inspectors in Classified Plant and as such AME are considered industry experts.

2014 Training Schedule

Kalgoorlie	Belmont
18/19 June	16/17 July (3 spots remaining)
